

# BMM Implemented Its Quality Assurance Testing Lab with SpiraTest from Inflectra

SpiraTest implemented to provide solid reliable test case collaboration software for clients

## Industry

Entertainment & Media

## Background

BMM Testlabs is the longest established and most experienced private independent gaming testing laboratory in the world. They have been serving the gaming industry for over 40 years.

## Objective

Looking for a software platform that could provide a central location for defect logging and share test reports with clients.

## Solution at a Glance

### Products Used:

- SpiraTest

### Features Used:

- Test Management
- Defect Tracking
- Exploratory Testing
- Custom Reporting

### Scale of Implementation:

- ~ 12 projects
- ~ 30 users

**“I would recommend SpiraTest’s cloud service to any facility needing a solid reliable test case collaboration software. The move to cloud with their support team was effortless.”**

– Aaron Warren, Senior IT Manager, BMMCA

**SpiraTest was originally chosen based on its pricing, consistent patches & features, and ease of use.**

Prior to the migration to cloud, we used the on-premises edition. We are enjoying the cloud-based benefits as our company has grown its roots to other countries.

The ongoing feature sets and consistent security patches give our administration team a sense of ease. Inflectra’s support team responds within 24 hours, usually less. Depending on when the inquiry is made.
