

CASE STUDY

Bruker Nano Optimizes Life Science Projects with SpiraPlan

ALM - SpiraPlan is our passion!

The Challenge

Bruker Nano, a leader in providing high-value life science research and diagnostics solutions, faced the challenge of modernizing their Microsoft Office-based toolset.

They sought to enhance their project oversight and agile capabilities in a field where breakthrough discoveries and new applications can significantly improve the quality of human life. To meet these objectives, Bruker Nano chose Inflectra's SpiraPlan to achieve this goal.

Why Choose SpiraPlan by Inflectra?

Bruker Nano had successfully used Inflectra's products on prior projects. SpiraPlan was chosen for its capabilities in:

- Regulatory compliance
- Requirements Traceability and audit controls
- Scaled Agile and project management functionality
- Advanced Quality Assurance.

Bruker Nano Optimizes Life Science Projects with SpiraPlan

Solution & Outcome:

With SpiraPlan, Bruker Nano centralized their QA processes, improved their documentation structure, and better managed their requirements.

The platform also addressed their specific pain point of report generation, enabling them to focus more on their core mission of advancing life science research and diagnostics.

Customer Satisfaction:

Bruker Nano gave the Inflectra Tech Support Team a 9 out of 10 rating for their role in the project's successful implementation and ongoing management.

Likelihood to Recommend:

Bruker Nano rated their likelihood of recommending Inflectra's platform to a friend or colleague as a perfect 10 out of 10, underscoring their satisfaction and trust in Inflectra's solutions.
